README.md
01. # code-highlight-n-print
02. A code highlighter for microsoft word and print code problems with there code, output, output
graphics, title, filename and watermark
03.
04. <hr>
05.
06. Download [`tool`](https://github.com/SGI-CAPP-AT2/code-highlight-n-print/tree/main/tool)
directory and use the tool
07.
08. OR
09.
10. Goto [tool](https://github.com/SGI-CAPP-AT2/code-highlight-n-print/tree/main/tool) or
[site:tool](http://sgi-capp-at2.github.io/code-highlight-n-print/tool)
11.
12. ## Description of project
13.
14. This project is helpful for all college students wants to attach their physical copies of code &
output with problem statement, filename and compiler details.
15.
16. ## Features
17.
18. - Black & white code highlighting saves your money for printing physical copy
19. - line numbering
20. - full support for rtf paste in microsoft word & google docs
21. - output and code have different blocks
22. - can even watermark your number
23.
24. ### Created by <img src="https://avatars.githubusercontent.com/u/77089227?s=40&v=4"
height="20px"/> [ShGI](https://github.com/SGI-CAPP-AT2)
25.
26. Recent fixes
27. - changed ui (new) 030922
28. - fixed listing error for print (new) 030922
29. - Added preformatted support for code block (old)
